

SWC
CANADA
STORM WATER COMPLIANCE

At SWC Canada, our goal is to assist Developers, Property Managers and Engineers meet local Storm Water Compliance regulations.

Provincial and Municipal governments require maintenance of storm water treatment systems to ensure that water quality/quantity standards are consistent with design specifications over time. All stormwater treatment systems - whether natural or manufactured - require maintenance. Failure to maintain a stormwater treatment system may result in fines, loss of business, or more severe penalties to the owner.

If a stormwater management system is not inspected annually, you don't know when it needs to be serviced. It may eventually cease to perform the environmental function for which it was designed, and you may risk a discharge and the subsequent costs of environmental cleanup.

Scheduled inspections fulfil your obligations in the environmental section of your Storm Water Permit. Inspections by qualified SWC Canada specialists will both ensure that your program is cost-effective and reduce your risk of discharge. Typically, one site inspection annually for a minimum of three years will provide the data necessary to establish a maintenance program based on need.

STORM WATER SYSTEM INSPECTION

- Oil Grit Separators/Water Quality Structures
- Manholes/Catch-basins
- Retention/Detention Systems
- Trench Drains
- Swales
- Inlet/Outlet Control Structures
- Complete Storm Water Management Systems

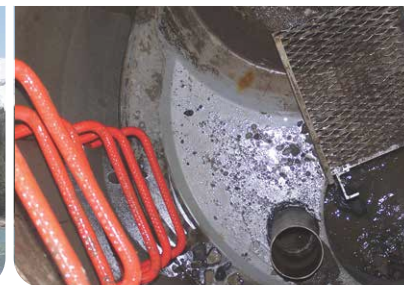

REDUCE COST, RISK and HASSLE

SWC Canada will develop and implement a site-specific stormwater inspection and maintenance program in order to ensure that your site is in compliance with all Provincial and Municipal stormwater management requirements. We make life easy for property managers by coordinating all work related to the inspection and maintenance of the stormwater management system.

COMPLIANCE

Cities and Municipalities are now requiring that a Storm Water Operation and Maintenance plan be in place, and are taking enforcement measures against those who do not comply.

At SWC Canada we will inspect the entire Storm Water System, coordinate all maintenance activities, and ensure that your site is in compliance with all municipal and local storm water requirements.

HELP PROTECT YOUR SIGNIFICANT CAPITAL INVESTMENT IN, UNDER and AROUND PARKING LOTS and BUILDINGS

At SWC Canada, we believe that services should fit the needs of a customer. With this in mind, our Storm Water System Inspection and Maintenance services offer a complete range of services that can be tailored to your specific site needs.

Tailor your plan to include:

- Single event or multi-year service agreements
- Pre-paid or pay as you go billing
- Pre-construction contracts to expedite permitting
- Post-construction contracts to meet regulatory requirements

INSPECTIONS and REPORTS

Every inspection is supported by an Inspection Report detailing the existing levels of oil / hydrocarbons and particulate matter, as well as the recommended course of action. You will also receive a report of service each time your Storm Water Management System is serviced. Retain these documents on file, as they serve as imperative proof of inspection and servicing to inquiring regulatory authorities.

As a value-added service, SWC Canada will deliver inspection reports to the authorities, or any other destination of your choice, should you direct us to do so. Otherwise, these reports are treated as strictly confidential.

Let SWC Canada help you maintain your investment and protect the environment.

EXPERTISE and EXPERIENCE

Make the most of your Storm Water Management System by having it maintained by SWC Canada. We have the expertise and experience to quickly and accurately identify maintenance needs so that system cleaning is only performed when necessary. Using state of the art maintenance technologies, SWC Canada ensures cleaning is done at the right time - saving you time and money.

HOW TO GET STARTED

In order to ensure you are compliant with Provincial and Municipal government regulations of your Storm Water Management Systems contact us today to schedule your site inspection.

Prepare the following site specific documents:

- Site plans
- Stormwater Management Permit / Storm Water Management System Discharge Permit
